POM04 INVESTMENT INITIATIVE CANDIDATE DATA SHEET

POC: Mr. David K. Hansen, PM Non-Lethal & Urban Operations, Ground Weapons Directorate

PROGRAM TITLE: Clear Facilities (CFAC)

SYSTEM DESCRIPTION: A family of Systems intended to address the special operational needs required for clearing operations on a facility. This program covers those specialized/specific requirements which are specific to the clearing mission from the time the mission is given until the time the facility is cleared and the organization moves on to its next objective. A facility is defined as any closed space. Examples of facilities are buildings, ships, boats, bunkers, trench systems, aircraft, ISO container, etc. This requirement addresses the full spectrum of lethality from lethal to non-lethal as well as many other aspects of clearing operations.

NATURE OF REQUIREMENT: The requirement arose out of a polling of the CinC's in 1996 in which they determined that there was a need within their areas of operations to clear facilities/spaces in a non-lethal as well as by lethal means. The USMC as the Executive Agent for Joint Non-Lethal Weapons directed that MCCDC and
