Notes: In POM 02 only requirements with either an approved MNS or ORD were allowed to compete. SON is a mechanism to speed up the process. If a requirement has both an MNS and an ORD, the MNS is the primary requirement. If the requirement has only an ORD, it should be sufficient to compete. Items with only UNS are unlikely to get a MNS or ORD approved in time remaining. A SON is possible if requirements have multiple names and there is potential for confusion. For CDTs access please contact Mrs. Donna Skebo at WDID Outlook.
